 Stats

A Stats section was added to help you achieve Tiered and Bundled deals

Manage Deals

T

Tiered rebate programs can have multiple per-case rebate amounts based on tiered sales targets. Each time your sales exceed to the next tier, the rebate you earn will increase. The progress bar shows your current sales progress within the program – the amounts above the progress bar show the amount of cases needed for each tier, while the amounts below show the rebate amounts for each tier. A quick summary box is shown below the progress bar to show your current rebate status, cases currently purchased, current rebate calculation and number of cases needed to purchase to advance to the next tier.

B

Bundle rebates will require you to purchase products from multiple manufacturers. If you have met the compliance for each manufacturer a green check mark will show. If you have not met compliance for each manufacturer a red "X" will show. Once all manufacturers' compliance is met, a green check will show in the Overall Compliance box – this means you are qualified for the program.

In Development

Enhanced capability to promote “on deal” products!

Capability to promote related or complimentary products!

Capability to shop by manufacturer!

Enhanced administrative functions for USG staff

Capability to show product attributes such as –

Quicker and more specific product searches

Scalability for the future and mirror servers
